Jockey Club Genetic Carrier Screening Programme for High Risk Couples

Funded by The Hong Kong Jockey Club Charities Trust, the 3-year Jockey Club Genetic Carrier Screening Programme for High Risk Couples commencing in May 2023 is co-organized by The Family Planning Association of Hong Kong (FPAHK) and The Chinese University of Hong Kong — Baylor College of Medicine Joint Centre for Medical Genetics (CUHK). It aims to promote public awareness on genetic health, provide free pre-genetic test assessment service to eligible persons before pregnancy and offer genetic tests if appropriate. The genetic tests used in this Programme are Carrier Screening plus Fragile X or ChromoSeq, which can detect a panel of genetic disorders which can be passed on to their babies.

If you are interested, please refer to programme content, eligibility and details at [programme website](#).
