

## Earth Investigation by Carlos-the-Alien

香港家庭計劃指導會  
The Family Planning Association of Hong Kong

Little Carlos, Teta and Gula, traveled through planets, where they investigated the physical and cultural development of different beings. After spending 3.24 million of years, they finally arrived to the Earth. Unfortunately, they met Naughty Matthew who made fun on them by giving inaccurate facts about origin of life. Let's help Teta and Gula to find out the correct answers!

The following is the report made by Teta and Gula:

1. Teta: Human Beings are interesting, an embryo starts to develop by the exchange of saliva between humans.

**Truth :** An embryo starts to develop by the joining of \_\_\_\_\_ and \_\_\_\_\_.

2. Gula: Oh yes! A baby develops inside the stomach before it is born.

**Truth :** A baby develops inside the \_\_\_\_\_ of its mother!

3. Teta: Oh, a baby needs to stay inside its mother's body for two years.  
(365 days a year) before it is born.

**Truth :** Most babies stay inside their mothers for about \_\_\_\_\_ weeks before they are born!

4. Gula: When a baby is growing insider its mother's body, the mother feeds it by stuffing food at her own belly button.

**Truth :** When a baby is growing insider its mother's body, an \_\_\_\_\_ carries nutrients from mother to baby, and get rid of waste by travelling back to mother.

Answers: 1.) sperm , ovum      2.) uterus      3.) forty      4.) umbilical cord
