What kind of jobs would you like to work when you grow up? Teacher? Chef? Doctor? Scientist? We often hear that some jobs only suit for men, and some for women, do you agree?

Below is a game of matching. If you think a particular career is perfectly matched with the skills or interest of a gender (Boys / Girls), then draw a line to link them up.

Both girls and boys share similar abilities, physically and verbally, for example. If you think you are able and with high interest of any careers, do not hesitate and equip yourself for the future. Working as a nurse, doctor, lawyer, musician, or police are suitable for both sexes.

Remember, boys and girls are equal! Everybody is a unique creature, we should accept and be happy with our gender, and fully develop our potentials.
